

## Pre-AI Governance Layer

AI processes. Human decides. WINDI guarantees.

# The Problem

Enterprises adopt AI without governance guardrails

## No Governance Layer

AI tools process sensitive data without institutional oversight or audit trails

## EU AI Act Deadline

August 2026: €35M fines for non-compliance. Most enterprises are unprepared

## Sovereignty Gap

Current GRC tools audit AFTER damage. No prevention layer exists between AI and decisions

€35M maximum fine per violation under EU AI Act |

August 2026 enforcement deadline

# The Solution

WINDI — The Pre-AI Governance Layer for institutional workflows

## AI Processes

Semantic Governance Engine  
scans documents across 6  
risk layers (R0-R5) in  
real-time

## Human Decides

Decision authority stays  
with people. AI cannot  
escalate its own permissions  
(Invariant I9)

## WINDI Guarantees

Immutable audit trail with  
Virtue Receipts, Merkle Tree  
integrity, and forensic  
ledger

Not a firewall. Not an audit tool. A governance guarantee between institutional decisions.

# How It Works

From air traffic controller to ethical circuit breaker

01

## Document Ingestion

Templates with surgical governance controls

02

## SGE Scanning

6-layer semantic analysis (R0-R5 risk)

03

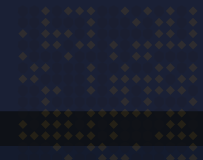

## Governance Decision

Human-only fields AI cannot modify

04

## Virtue Receipt

Immutable forensic ledger + audit trail

WINDI Verity →

2025-04-10 18:27:07 UTC

## Zero-Knowledge Architecture

SGE runs client-side. Core systems receive only hashes, categories, and metadata — never sensitive data. Clients retain their terabytes. WINDI provides governance protocols. "Instruments without data."

# Market Opportunity

**€65B** Global GRC Market (2025)  
Governance, Risk & Compliance

**€12B** EU AI Compliance (SAM)  
Enterprises needing AI Act readiness

**€2.4B** DACH Region (SOM)  
Initial target: Germany, Austria, Switzerland

## Why Now?

- EU AI Act enforcement begins Aug 2026
- ✓ €35M fines create urgent buyer demand
- ✓ No governance-first solution exists in market
- ✓ AI adoption accelerating faster than compliance
- ✓ German enterprises demand data sovereignty
- ✓ DACH region: highest compliance awareness in EU

# Business Model

SaaS + Governance-as-a-Service — tiered for scale

FREE

€0

per user/month

- ✓ Up to 3 users
- ✓ Basic governance templates
- ✓ Document scanning (limited)
- ✓ Community support

PRO

€25-40

per user/month

- ✓ Full SGE 6-layer scanning
- ✓ Custom ISP profiles
- ✓ Forensic ledger + Receipts
- ✓ PHO Gate + AI Draft Mode

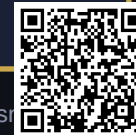

ENTERPRISE

€80-120

per user/month

- ✓ On-premise deployment option
- ✓ Custom governance rules
- ✓ SLA + dedicated support
- ✓ Multi-product access

WINDI Verdy →

Target: 10 mandatories per decision, not 10K users per process. WINDI doesn't process SAP — it guarantees SAP.

# Traction & Milestones

Real production data · Q1–Q2 2026

**56,757+**

Forensic Seals  
Issued

**17**

ISP Profiles

# Competitive Landscape

From firefighter to air traffic controller

	Traditional GRC	AI Audit Tools	WINDI
Approach	Post-incident audit	AI monitoring	Pre-AI governance
When	After damage	During processing	Before AI touches data
Data Access	Full data exposure	Requires data access	Zero-knowledge
AI Act Ready	Partial	Partial	Native compliance
Sovereignty	Vendor-dependent	Cloud-dependent	Client-side SGE

WINDI's moat: Zero-knowledge architecture + constitutional invariance → never see client data.

"Instruments without data."

# Team

**JMC**

## Jobber Mögele Correa

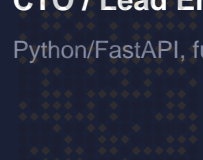

Founder & Chief Governance Officer (CGO)

German-Brazilian professional with expertise in institutional governance, AI orchestration, and regulatory compliance. Creator of the Three Dragons Protocol and WINDI constitutional framework with 9 immutable invariants. Based in Kempten (Allgäu), Bavaria, Germany.

## Planned Hires with Seed Funding

### CTO / Lead Engineer

Python/FastAPI, full-stack, security

### Sales Lead (DACH)

Enterprise B2B, GRC market

### Governance Specialist

EU AI Act, compliance frameworks

WINDI Verdy →
